

NUTANIX

Run anything anywhere

Your journey to smarter VDI

Virtual Desktop Infrastructure (VDI) now delivers the performance, scalability and security required to run anything, anywhere. Modern distributed workers need a virtual desktop experience that keeps data and work in constant flow.

But legacy IT can't keep up

Data silos

Complex management

Rigid infrastructure

Limited scalability

AI bottlenecks

Hybrid friction

Performance lag

License overload

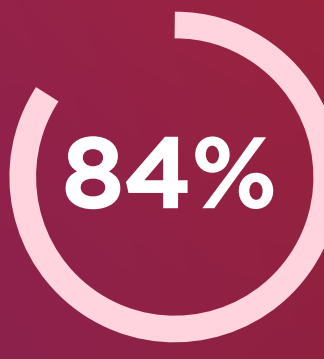

Escalating overheads

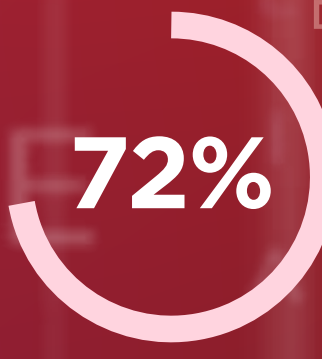

Meanwhile, businesses are shifting to hybrid multicloud architectures for cloud agility and on-prem control.

use hybrid or multicloud but only 18% have unified management

prioritise data center modernisation

face rising hypervisor costs prompting re-evaluation

VDI for the AI era

VDI has had to evolve from remote desktops to AI and distributed apps.

They demand infrastructure with consistency, security, and speed. That's why hybrid multicloud is on the rise:

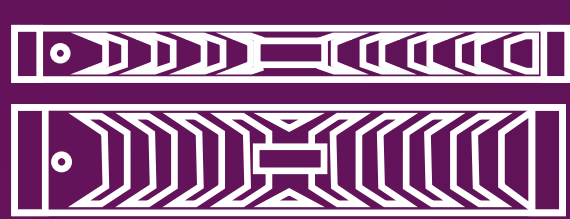

92% use multiple public clouds

84% say consistency drives efficiency

53% run on-prem AI for control and privacy

VDI is now the engine of the modern, intelligent workplace.

The Power of Lenovo and Nutanix

Lenovo ThinkAgile HX Series

Nutanix Cloud Platform

Unified hybrid multicloud

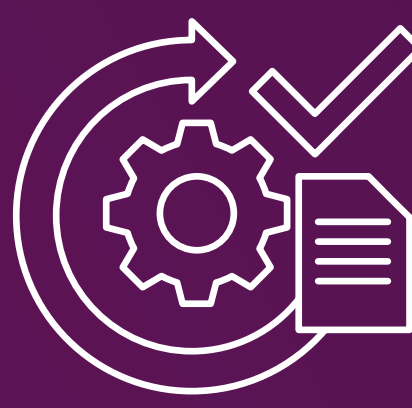

The foundation for modern VDI

Simple to run

Easy to scale

Built for the future

Lenovo

Trusted innovation

up to **92%** less downtime with self-healing automation

up to **60%** lower costs, 40% less CapEx

8x faster desktop deployment with one-click provisioning

7 years server reliability 5+ years running (ITIC)

70% use hybrid or multicloud but only 18% have unified management

NUTANIX

Proven performance

391% ROI over three years

41% lower infrastructure costs

77% fewer unplanned outages

88% faster storage deployment

40% higher developer productivity

Build your VDI your way

Your platform: Choose EUC broker, hypervisor, and cloud.

Your infrastructure: Deploy on-prem, in cloud, or hybrid.

Your model: Pay-as-you-go with Lenovo TruScale or own outright.

Your scale: Start small and grow without re-architecting.

Your users: Deliver a high-performance experience to every persona.

Breakthrough the boundaries

Run anything anywhere, securely, sustainably, and at scale with Lenovo and Nutanix.
